<http://wojoscripts.com/cmspro/>

Thank you for your purchase! If you have any questions that you feel should have been in this document, please log in using the account used to purchase the file and email via my user profile page contact form there. Thanks!

For questions on basic HTML, JavaScript or CSS editing - please give your question a quick Google or visit W3Schools as theme issues get top priority.

Version 4.0

Requirements

Please ensure your web host meets the application requirements. The lists of requirements are:

Web Server Requirements

- Operating System: Linux, Unix, or Windows
- Web Server: Apache
- Scripting Language: PHP 5.3 or above
- Apache mod_rewrite
- Php GD library
- Database: MySQL 5.1 or above (Mysqli driver enabled)

If you're unsure whether your server meets these requirements, simply ask your hosting provider.

Install

Unzip the CMS Pro package into your local hard drive. If you don't have WinZip, you can download it for free [here](#).

Using an FTP program (such as Filezilla, which is free, or a commercial package such as CuteFTP), login to your web server and copy the CMS Pro files across into your base website directory. This directory is commonly called 'public_html', 'html', 'www' or 'httpdocs'. If you're not sure what it is, your webhost provider will be able to tell you.

Web Server Requirements

CMS pro requires the following files/directories to have 'write' permissions set. If you're running on a Linux or Unix web host, you can use your FTP program and use the 'CHMOD' ('Change Mode') function to grant writes permissions.

If your host is running Windows, you will need to contact your hosting provider about setting up write permissions on these files/folders.

Folders, CHMOD these to 755:

- /uploads/
- /cache /
- /admin/backups/

NOTE: ALTHOUGH IT SAYS 755, SOME WEBHOSTS MAY REQUIRE 775 OR 777 INSTEAD.

MySQL Database

CMS Pro makes use of a MySQL database to store your data. This database must be created before you run the CMS Pro installation wizard. Your MySQL user account should also have full grant access to that database.

You will need the database connection details during the setup wizard.

Setting up your database may differ with your webhost and what software they use for your web hosting control panel. If you don't know how ask your hosting provider.

Setup Wizard

CMS Pro includes a simple 3 step installation process. To start the setup wizard, navigate to the directory that you uploaded CMS Pro, for example:
<http://www.example.com/>.

The CMS Pro setup wizard will appear. Follow simple on screen instructions.

What's New?

Version 4.0 is a complete rewrite of existing CMS pro. This is not just an upgrade, but a brand new version, with tons of new features:

Most Important Features

- New url rewriting (now using directory structure)
- Removed post section, (no need to create posts anymore)
- Unified user dashboard with premium modules integration
- New template engine, with css compression
- New Admin panel (fully responsive)
- New unified admin dashboard (premium module stats included)
- New WYSIWYG editor, fully html5 complaint
- New and improved sliders, gallery, events and plugins
- New video slider
- New content slider
- New language file format (xml)
- Edit language files from admin panel
- Create newsletter templates
- Add menu captions
- Font Awesome icons for menus
- Add page captions (tagline)
- Dedicated login, register, search and sitemap pages, with the same functionality as the rest of the pages.
- Many more...

Please note that you can't upgrade from any previous CMS pro version, due to completely different database and file structure.

About

CMS Pro is the most intuitive CMS (Content Management System) that a web agency can implement for their customers. It's perfect for small business websites and is really easy to use and to implement. The value of CMS Pro is in its intuitiveness. With CMS Pro, content management becomes as easy as desktop publishing.

The real value to the customer does not come from hundreds of features that they can't or won't ever use. Real value comes from making it really simple to use some great power features that get the job done.

That's exactly what CMS Pro delivers. CMS Pro allows small business owners manage their entire site, or change their web site design in seconds...

Features

- Fully Responsive
- Modular design
- Dynamic layout
- Unique page layout
- Dynamic menu creation
- User Permissions
- Smart Help System
- Database backup
- Sitemap Builder
- SEO Optimized
- Powerful file manager
- Membership management
- PayPal and Skrill and offline payments integrated
- Full Multilingual Support
- Built in commenting system
- And many more...
